Available in standard lengths of 200 cm, this FP3 LED tile profile is designed for LED strips with a maximum width of 8 mm. This profile system has a wing with a large surface area (20 mm wide) on both sides, which can be filled with tile adhesive and thus integrated into the tile concept. The tiles are glued to the wing. Thanks to its large surface area, the FP3 LED tile profile dissipates the generated heat very well.

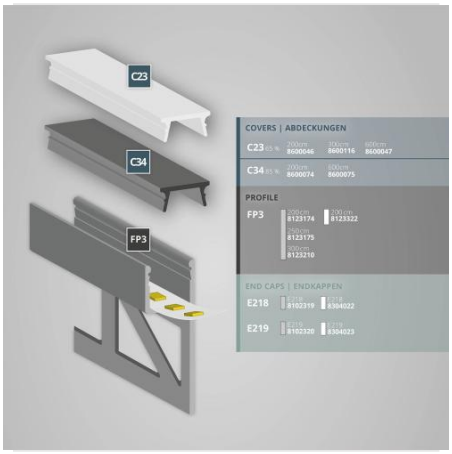

Features

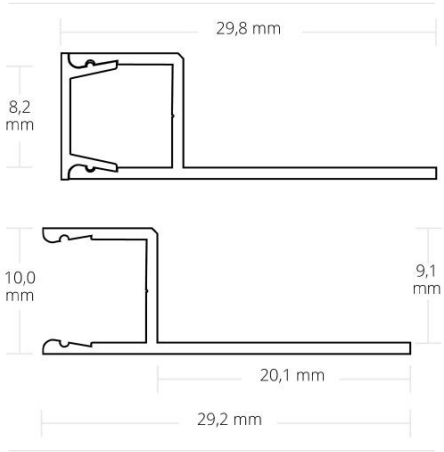

- Type: Tile
- Max. width LED strip: 8 mm

Technical specifications:
