The TBP5 drywall profile comes standard in a length of 300 cm and is suitable for LED strips with a maximum width of 20 mm. The low height of the profile provides a larger beam angle for the LED strips present, allowing the light to reach further compared to other profiles. The extra large surface area of the profile ensures that even the heat of the strongest LED chips is easily dissipated.

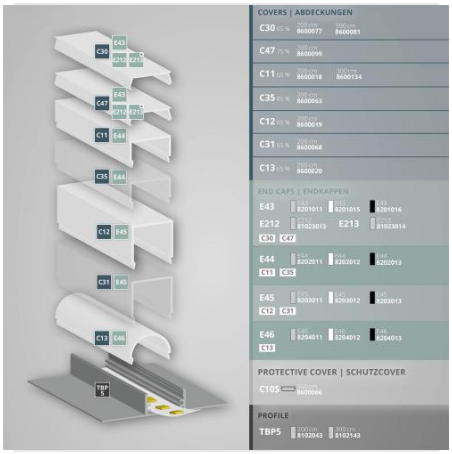

**Features**

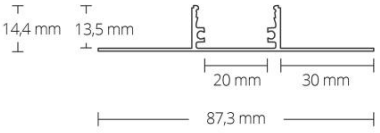

Type: Drywall
Max. width LED strip: 20 mm
