The VA6 LED profile is suitable for creating indirect lighting. Each profile has a standard length of 200 cm and is made of high-quality anodized aluminum. The recessed shade provides an indirect and non-glare light experience.

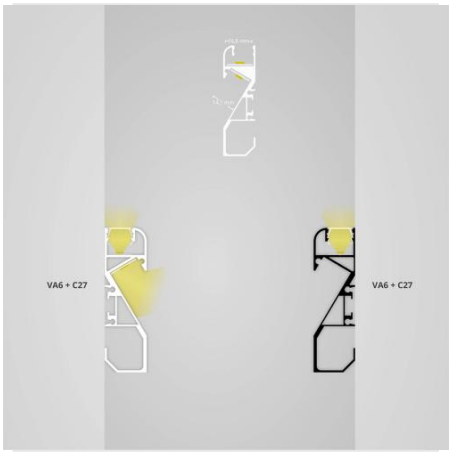

In addition, this profile is designed as a skirting profile, splitting the light between the wall and the floor. The profile can be combined with an LED strip with a maximum width of 12 or 16 mm, which is glued to the inside of the profile.

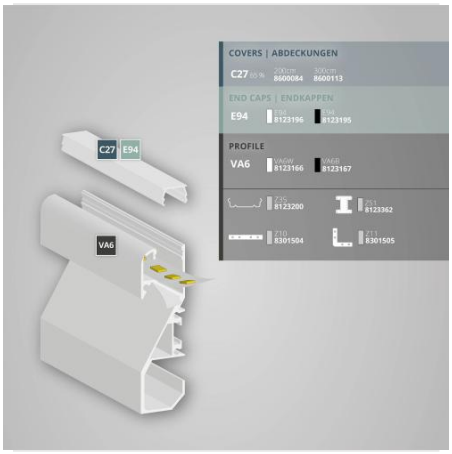

Features

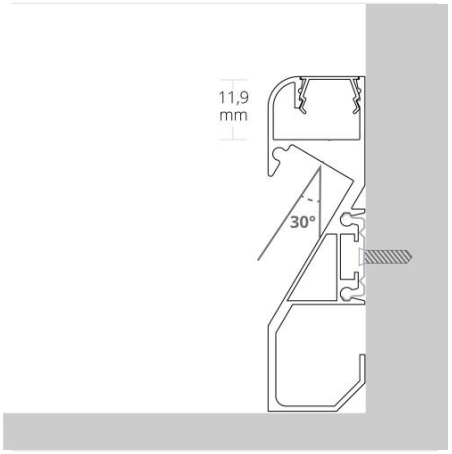

- Type: Specials
- Max. width LED strip: 12/16 mm

Technical specifications:
